Install Clearance:	0" Side Cabinet 0" Back Wall 3" Top Cabinet Per Side	The cavity design of the oven provides the most precise temperature control, which delivers even heat distribution resulting in versatile performance. It has the largest oven capacity available on a 30" range and will accommodate a full-size commercial 18" x 26" baking sheet.

### INFRARED BROILER:

Because of its popularity in the commercial market, the direct-fired ceramic infrared broiler is standard on all residential ranges. The large burner produces 1850 F of intense, searing heat close to the burner, while effecting a gentler broiling for foods placed farther away. The broiler is fully recessed into the oven's top to create maximum cooking space.

### FULL MOTION GRATES:

Bring sauce to a boil while stirring on a front burner, then slide it to the rear to simmer while you saute up front! Our full motion grates allow you to easily reposition pots and pans from front to rear burners without lifting. The grates are also oversized to accommodate the largest stock pots and saute pans.
